Sprint #2 Report

Hobby Tracker

Hobby-Trackers

5/9/2023

Actions to Stop Doing:

- Merging to main without other input

    - Can cause issues if there are conflicts and the person pushing does not realize

    - Or they cause changes that interfere with current progression work

- Changing from our style guide

    - Instances of naming conventions not following

    - Forces us to go back and restyle after the initial push, which is not ideal for members to be doing

Actions to Start Doing:

- Making sure to migrate the database after pulling a schema change

    - Sometimes when we make changes to the schema, forgetting to migrate causes issues when trying to run code

    - Remind people to utilize the scripts in the code to help configure code properly

        - Reduce time fixing issues that already have a solution

- Make sure that styling will not appear differently, for different screen sizes.

    - We would have people styling on their own machine, and since they were catering to solely their machine, it would appear different on others

- Keep track of hours worked

- Personally keep track, so that the scrum master is able to gather these hours easily for burn up charts
    - Allows for easier compilation of hours being worked

Actions to Keep Doing:

- Keep going to scrum meetings to discuss work progress
    - Gives everyone an up to date of what is going on and if other work needs to be done, due to blockers
- Working with members that are apart of the same user-story/task
    - Doing a good job at communicating with specific members to get certain tasks done
    - Communication between these members gives a better outcome on the code

Work Completed/Not Completed:

- **Completed: Able to complete all user stories**
    - Able to post image/description to database
    - User authentication
    - Website compatible on mobile devices

- **Not Completed:**
    - NA

Work Completion Rate:

The team completed the 3 user stories we set out to do from our sprint plan.

- **Total number of user stories completed:** 3

- **Total number of estimated ideal work hours completed:** 100

- **Total number of days during the sprint:** 14

- **User-Stories/Day:** $3/14 \approx 0.214$ User-Stories per day

- **Hours/Day:** $100/14 \approx 7.14$ hours per day

- **Averages Through all sprints**

  - **User-Stories/Day:** $(3+3) / (14+14) \approx 0.214$ User-Stories per day

  - **Hours/Day:** $(60+100) / (14+14) \approx 5.714$ hours per day
